

# **B.Tech. (Computer Science Engineering in Artificial Intelligence & Machine Learning)**

Department: Skill Department of Industry 4.0

Faculty: Skill Faculty of Engineering & Technology

Total Programme Fee (Rs.): 22250/-

**Eligibility:** Candidates with Senior Secondary/10+2/12th with Mathematics and one language (Hindi/English/Sanskrit etc.) with atleast 50% marks in either Physics, Chemistry/Computer Sc., Mathematics (PCM) and one language paper or in the relevant examination

**About the Programme:** Development & Applications of Artificial Intelligence (AI) and Machine Learning (ML) have seen an exponential growth in the last few years. AI is important because it can help solve immensely difficult issues in various industries, such as entertainment, education, health, commerce, transport and utilities.

The B.Tech. programmes (CS with AI & ML) specializations offered by the University are completely in line with existing & emerging needs of the industry, Research & Academics. The program offers various specialization related courses to build domain knowledge and provide the relevant skills in multi-disciplinary areas of studies, Immense significance is placed on industry internships and research publications.
