Shree Guru Gobind Singh Tricentenary University Faculty of Nursing

Pre PhD- Nursing Curriculum

Recent advance in Nursing Science and theory development including Leadership

Total Marks: 80

 Current health issues and policies: Analysis of current health problems – national & global Health care delivery system in India National health policy, population policy and alternative systems of medicine Health policy issues relevant to nursing practice – Development of nursing serving health policy The functions and roles of law in health care delivery – Existing legislations related. 	Unit	Course Content
12. Bio-medical waste management. 13. Cardio pulmonary resuscitation end of life care Nursing Leadership In Health Care Delivery System 1. Current health issues and policies: 1. Analysis of current health problems – national & global 2. Health care delivery system in India 3. National health policy, population policy and alternative systems of medicine 4. Health policy issues relevant to nursing practice – Development of nursing servi in health policy 5. The functions and roles of law in health care delivery – Existing legislations related to nursing. Laws for new and emerging roles (e.g) Nurse practitioner, priving practice (nursing homes) 6. Social system and health policy 7. Politics & health policy – Lobbying for development of nursing profession 8. Health economics and health policy (Economics of health care and nursing) 9. Health insurance 2. Nursing Leadership: 1. Leadership theories 2. Nursing leadership, decision making & change process	T. Carolinavica	Introduction: 1. Education and Nursing service: Definition, aims, concepts, philosophies & their education implication. Impact of social, economical, political& technological changes on education. 2. Professional education 3. Current trends and issues in education and service 4. Trends in development of nursing education in India 5. Recent advances in Nursing 2.Nursing Practice 1. Framework, Scope and trends. 2. Alternative modalities of care, alternative systems of complementary therapies. 3. Extended and Expanded role of the nurse in promotive, preventive, curative and restorative health care delivery system in community and institutions. 4. Health promotion and primary health care. 5. Independent practice issues – Independent nurse midwifery practitioner. 6. Collaboration issues and models within and outside nursing. 7. Models of prevention. 8. Family nursing, Home nursing 9. Role of nurse – Evidence based nursing practice. 10. Innovations in nursing
13. Cardio pulmonary resuscitation end of life care Nursing Leadership In Health Care Delivery System 1. Current health issues and policies: 1. Analysis of current health problems – national & global 2. Health care delivery system in India 3. National health policy, population policy and alternative systems of medicine 4. Health policy issues relevant to nursing practice – Development of nursing servi in health policy 5. The functions and roles of law in health care delivery – Existing legislations related nursing. Laws for new and emerging roles (e.g) Nurse practitioner, privapractice (nursing homes) 6. Social system and health policy 7. Politics & health policy – Lobbying for development of nursing profession 8. Health economics and health policy (Economics of health care and nursing) 9. Health insurance 2. Nursing Leadership: 1. Leadership theories 2. Nursing leadership, decision making & change process		
 Nursing Leadership In Health Care Delivery System 1. Current health issues and policies: Analysis of current health problems – national & global Health care delivery system in India National health policy, population policy and alternative systems of medicine Health policy issues relevant to nursing practice – Development of nursing serving health policy The functions and roles of law in health care delivery – Existing legislations related to nursing. Laws for new and emerging roles (e.g) Nurse practitioner, privapractice (nursing homes) Social system and health policy Politics & health policy – Lobbying for development of nursing profession Health economics and health policy (Economics of health care and nursing) Health insurance Nursing Leadership: Leadership theories Nursing leadership, decision making & change process 		
 Analysis of current health problems – national & global Health care delivery system in India National health policy, population policy and alternative systems of medicine Health policy issues relevant to nursing practice – Development of nursing serving health policy The functions and roles of law in health care delivery – Existing legislations related to nursing. Laws for new and emerging roles (e.g) Nurse practitioner, prival practice (nursing homes) Social system and health policy Politics & health policy – Lobbying for development of nursing profession Health economics and health policy (Economics of health care and nursing) Health insurance Nursing Leadership: Leadership theories Nursing leadership, decision making & change process 	II	
 Health care delivery system in India National health policy, population policy and alternative systems of medicine Health policy issues relevant to nursing practice – Development of nursing serving health policy The functions and roles of law in health care delivery – Existing legislations related to nursing. 8. Health economics and health policy (Economics of health care and nursing) 9. Health insurance 2. Nursing Leadership: 1. Leadership theories 2. Nursing leadership, decision making & change process		7.6
9. Health insurance 2. Nursing Leadership: 1. Leadership theories 2. Nursing leadership, decision making & change process		
 Leadership theories Nursing leadership, decision making & change process 		
 Leadership theories Nursing leadership, decision making & change process 		
2. Nursing leadership, decision making & change process		
Printed resource printing and management by naise teaders		
		Panining and management by nurse readers

Dean
Faculty of Nursing
SGT University
Budhera, Gurugram

- 4. Profession building in health care system Advocacy, Lobbing
- 5. Nursing ethics: Code of ethics, professional conduct for nurses in India. Nursing standards, nursing practice, standards and quality assurance
- 6. Human relations: Valuing human being
- 7. Communication skills

3. Nursing informatics:

- 1. Overview of Computers and Nursing
- 2. Computer Systems- Data processing, the internet, a nursing resource
- 3. Nursing Informatics and health care policy, privacy, confidentiality and security
- 4. Nursing informatics theory, clinical information systems
- 5. Applications- Practice applications, Administrative application (information technology for nursing managers), educational applications and Research applications.
- 6. Consumer use of informatics
- 7. The future of informatics

III Philosophy of Nursing Science and Theoretical Perspectives

- 1. Introduction to the course, study of philosophy, History of philosophy
- 2. History and philosophy of nursing science
- 3. Nursing as a science and a discipline (Evolution and development)
- 4. Nursing knowledge and development
 - Historical roots
 - Domains of nursing
 - Paradigms in nursing
 - *Knowledge development
- 5. Paradigms that influence approach to nursing science development.
- 6. Epistemological and ontological assumptions of diverse approaches to knowledge generation in nursing.

IV Nursing Theories and Theory Development

1. Epistemology ·

- Concepts, statements and theories
- Strategies for theory development
- Evaluation of theories
- Metatheory

2. Overview of theory in nursing-

- Overview of theory
- Importance of theory in nursing
- Historical overview
- Classification of theories in nursing
- Issues in theory development in Nursing
- Nursing Theory: an examination of the concept development of nursing theory..

3. Overview of nursing theories-

- The theorists and the theories
 - On nursing clients

On human being - Environment interactions

On interactions

On nursing therapeutics

Other theories

- 4. Analysis of Nursing theories & evaluation of nursing theories-
- 5. Nursing theory, practice & research
- 7. Inter relationships between science, theory, practice and researchin Nursing.
